

MP-24-4 4-slot Charging Station

Features

- Allows for charging 4 ACT-24R receivers.
- Each slot has an individual charging circuit and separate “red” (charging) and “green” (ready) indicators.
- DC 12 V / 0.75 A power supply.
- Quick-charge for less than 4 hours. The maximum power consumption is less than 9 W.
- A modular design is ideal for the equipment supplier to organize a large charging system.
